

HEALinc FUTURE HEALTH INNOVATION SUMMIT

Dr. Desirée Cox, MD, MPhil, PhD
CEO & Founder

Hello Scholars – welcome to the 2023 HEALinc Bridging-the-Future STEM Program!

The Bridging-the-Future Program has been part of HEALinc since the Inaugural Summit in 2018. The program has grown from strength to strength. We are excited that you will be part of the 2023 program – the 5th year of the program's existence, and the year we quantum leap to the next level.

The 2023 HEALinc Bridging-the-Future Program will run from January 17th, 2023 through April 17th, 2023. You will be part of the 3rd cohort of STEM youth participants. The HEALinc Bridging-the-Future Program provides a platform for you – the next generation of innovators and problem solvers – to fire your passion in science, learn valuable skills and gain exposure to STEM technologies. You will also have a lot of fun!

We'll connect each week (via Zoom) on Tuesday between 6 PM-8PM EST, starting January 17th, 2023. Each week, we'll take on a different topic. Each topic we work on is designed to expose you to new ideas and help you learn skills you need to hit the ground running in the science and tech industry. We'll also have group discussions, and we'll do some research on hot topics in innovation. By the end of the program, you will each have built a portfolio you can be proud of. All work done during this program will be compiled into a digital format for future student records.

ALL OF THIS IS FREE. You have everything to gain! All we ask is that you 1) bring your 'A' game at all times, 2) complete the tasks assigned, and 3) be on time to each session. Students must maintain the standards of a BTF Scholar and complete ALL required coursework to obtain the certificate of completion and be eligible to apply for the HEALinc Bridging-the-Future STEM Summer Camp Scholarship.

[Click here](#) to register for the 2023 Bridging-the-Future STEM Program. If you have any questions, please feel free to reach out to me on my personal email.

All best,

Crachad Laing
