This special HEALinc Bridging-the-Future workshop is designed for STEM youth and their parents, nursing and medical students, and adult professionals of all ages considering adapting their careers in these changing times.

Workshop topics include:

- Shifting trends in healthcare
- AI, biotech and the life sciences
- Longevity and regenerative medicine
- Creativity and overall health
- Work-life balance
- Pursuing your passions for science and creativity together

Workshop questions include:

- How do I navigate a successful career in the new healthcare paradigm of longevity and regenerative medicine?
- Should I go to college? Is college necessary?
- What should I study in college?
- Should I work and study part-time to save money and minimize debt?
- How do I know what's right for me?
- What resources are out there for people growing up in developing countries in the Caribbean and/or Latin America, or a rural, remote and/or underserved community in the US, North America or elsewhere?
